

What do you think about health research?

We would love to hear from you!

iTHRIV aims to better understand community members' and health researchers' perceptions about community involvement in health research.

Thank you for helping us and your community!

By completing this anonymous survey you can help our collaboration with community members to improve health across the Commonwealth of Virginia. We plan to share the survey findings through the iTHRIV website, presentations and articles.

- This anonymous survey is estimated to take 5-10 minutes to complete.
- Your participation is completely voluntary
- The survey is currently open from May 4th - Jun. 30th
- Please consider sharing the survey link with your friends, family, and community members. The more people that respond, the more we know.
